### **DETAILED ACTION**

Any rejections and/or objections, made in the previous Office Action, and not repeated below, are hereby withdrawn.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

#### ***Election/Restrictions***

Claims 10-45, 47, and 57-59 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions.

#### ***Priority***

The amendment to the specification filed August 25, 2006 lists U.S. Patent No. 7,048,781 as corresponding to application serial no. 10/134,178. This is incorrect. Application serial no. 10/134,178 was patented as U.S. 6,719,828. Correction is required.

For the reasons listed in the previous action, claims 1-9, 46, 48-56 and 60 of the instant application are not entitled to priority to application serial no. 10/134,178 (US 6,719,828).

For the reasons that follow, claims 1-9, 46, 48-56 and 60 of the instant application are not entitled to priority to application serial no. 10/681,467 (US 7,048,781).

Art Unit: 1755

The benefit claim filed on August 25, 2006 to Application Serial No. 10/681,467 (now U.S. Patent No. 7,048,781) was not entered because the required reference was not timely filed within the time period set forth in 37 CFR 1.78(a)(2) or (a)(5).

If the application is an application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the reference to the prior application must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a nonprovisional application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the reference to the prior application must be made during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii).

If applicant desires the benefit under 35 U.S.C. 120 based upon a previously filed application, applicant must file a petition for an unintentionally delayed benefit claim under 37 CFR 1.78(a)(3) or (a)(6). The petition must be accompanied by: (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted); (2) a surcharge under 37 CFR 1.17(t); and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

***Claim Rejections - 35 USC § 102***

Claims 1-9, 46, 48-56 and 60 are rejected under 35 U.S.C. 102(e) as being anticipated by Lovell (US Patent No. 7,048,781).

As noted above, claims 1-9, 46, 48-56 and 60 are not entitled to filing date of the parent application, and the effective filing date of the claims is February 19, 2004. Lovell was filed October 7, 2003, and therefore qualifies as prior art under § 102(e)

The applied reference has a common inventor with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Lovell discloses a mercury removal sorbent formed of a layered material containing ion exchange sites, polyvalent metals at the exchange sites, and thiocarbonates or polysulfides reacted with the polyvalent metals. See the abstract, col. 13, line 64 to col. 14, line 2.

The presently claimed species of layered materials can be found in Lovell at col. 8, lines 5-10.

***Response to Arguments***

Applicant's arguments filed September 29, 2006 have been fully considered but they are not persuasive.

Art Unit: 1755

Applicants assert that the amendments to the claims and specification overcome the rejection over Lovell (US 7,048,781). The basis for this assertion appears to be the priority claim under 35 U.S.C. § 120. For the reasons stated above, the claim to priority was not granted and the rejection is maintained.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
